

LIBRARY MANAGEMENT SYSTEM

This the company logo on the top left of the index page

The main website logo on the middle of the index page is as follows

The corporate design I have implemented on the website is using the key design mentioned on the slides. The corporate design is as simple and informative as possible also made in a way where it is easy to navigate for the user.

The top left has the company logo, I have a company logo as well as main website logo in the body as I feel it added to the aesthetic of the website. The main website logo in the body as well as the description mentioned below made the aim and services of the website as clear as possible. The footer of the index page has the disclaimer which is essential there is also a hyperlink on the index page below the disclaimer '[imprint page](#)' which takes you to the imprint page that has the author details as well as the disclaimer therefore completing the requirements of this assignment.

Description: A library management system is software that is designed to manage all the functions of a library. It helps librarian to maintain the database of new books and the books that are borrowed by members along with their due dates. This system completely automates all your library's activities. The best way to maintain, organize, and handle countless books systematically is to implement a library management system software. A library management system is used to maintain library records. It tracks the records of the number of books in the library, how many books are issued, or how many books have been returned or renewed or late fine charges, etc. You can find books in an instant, issue/reissue books quickly, and manage all the data efficiently and orderly using this system. The purpose of a library management system is to provide instant and accurate data regarding any type of book, thereby saving a lot of time and effort.

Key design elements: the title as seen is library management system the font I have used is sans serif the colours I have used are brown green and yellow(set using the rgb format) the overall look and feel of the site is simple yet appealing to the user.

Website: <http://clabsql.clamv.jacobs-university.de/~prshah/>

Index page: first page displayed when you click the above link it is a navigation page with details about the aims and services of the website

Link: <http://clabsql.clamv.jacobs-university.de/~prshah/index.html>

Imprint page: page with author details as well the disclaimer (also shown in footer of the index page) the imprint page is accessible from the index page by clicking hyperlink '[imprint page](#)'

Link: <http://clabsql.clamv.jacobs-university.de/~prshah/imprint.html>

CSS file: used for the layout of the website i.e. index.html controlling how the html elements look in the browser

Link: <http://clabsql.clamv.jacobs-university.de/~prshah/style.css>

Image folder: contains the images used for design the site
